COLLECTING DATA

Think about Santiago. His teacher, Alma, and his parents were concerned about his language and fine motor development. Examples of activities during which Alma might collect data on Santiago's language development are provided below. Likewise, what are some different times during the day and/or activities when Alma could collect data on Santiago's fine motor development? Record your ideas under the heading Fine Motor Observations for Santiago. Use the language observation examples as a guide.

Language Observations for Santiago

1. Greeting and responding to his friends when he enters the room
2. Participating in discussion during group time
3. Participating when listening to a story
4. Playing with friends in dramatic play
5. Playing with friends on the playground
