RE: Bibliography-Sources Using CHIS Child data – Revised Draft

David:
Attached is the final revision of the bibliography of research using child data from the California Health Interview Survey (CHIS). This bibliography represents a snapshot of references from peer-review publications and publications from the UCLA Center for Health Policy Research. Google Scholar, PubMed, Ebsco, and World Cat were searched using the following terms: CHIS, California Health Interview Survey, California Health Survey, child, children ages 0-5, ages 6-11, ages -11, and pediatric(s). The UCLA Center for Health Policy Research’s website was manually searched for policy briefs and reports published by the Center.

References are organized alphabetically by topic. First 5 funded briefs and reports are grouped at the beginning of the document and include the pending policy brief on the Talk. Read. Sing.® campaign. As shown in Table 1, references cover a variety of topic areas.
